

## SILVER HALIDE TABULAR GRAIN EMULSION

### ABSTRACT OF THE INVENTION

- 5        The present invention relates to a new silver halide tabular grain emulsion, wherein said silver halide emulsion comprises tabular grains having average thickness lower than 0.15  $\mu\text{m}$ , an average diameter of at least 1.20  $\mu\text{m}$  and an average aspect ratio of at least 8:1, and showing a coefficient of diameter variation COVd within the range of from 31% to 44% and a coefficient of thickness variation  
10      COVt lower than 25%.
